2025 Lincoln Electric Holdings, Inc.

Gross Profit: Gross profit as a percentage of sales decreased 0.5% for 2025 as compared to 2024 driven by lower volumes partially offset by effective cost management. The year ended December 31, 2025 includes a last-in, first-out ("LIFO") charge of \$17,956, which is primarily due to rising input costs. This compares with a LIFO benefit of \$9,313 in 2024.

Selling, General & Administrative ("SG&A") Expenses: SG&A expenses increased in 2025 as compared to 2024 primarily due to acquisitions. SG&A expenses as a percentage of sales decreased primarily due to effective cost management.

Rationalization and Asset Impairment Net Charges: Charges in 2025 and 2024 relate to rationalization plans within all three reportable segments . Charges in 2024 include the impact of the Company's disposition of its Russian entity. Refer to Note 7 to the consolidated financial statements for further information on the Company's rationalization plans.

Other Income: Other income for 2025 primarily relates to the non-recurring items such as equity income and other non-operating gains. Income Taxes: The effective tax rate was higher in 2025 as compared to 2024 primarily driven by the impact of the One Big Beautiful Bill Act (“OBBBA”), partially offset by the mix of earnings and timing of discrete tax items. Refer to Note 13 to the consolidated financial statements for further details.

(3) Increase for Americas Welding and

International Welding due to the acquisitions discussed in Note 4 to the consolidated financial statements. (4) Increase for International Welding relates to the weaker U.S. dollar.

AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

The Company's primary financial market risks include fluctuations in currency exchange rates, commodity prices and interest rates. The Company manages these risks by using derivative financial instruments in accordance with established policies and procedures. The Company does not enter into derivatives or other financial instruments for trading or speculative purposes. Included below is a sensitivity analysis based upon a hypothetical 10% weakening or strengthening in the U.S. dollar compared to foreign currency exchange rates at December 31, 2025. The derivative, borrowing and investment arrangements in effect at December 31, 2025 were compared to the hypothetical foreign exchange rates in the sensitivity analysis to determine the effect on the Company's current period consolidated financial statements. 32 Table of Contents ■ Foreign Currency

Exchange Risk The Company enters into forward foreign exchange contracts principally to hedge the currency fluctuations in transactions denominated in foreign currencies, thereby limiting the Company's risk that would otherwise result from changes in exchange rates. At December 31, 2025, the Company hedged certain third-party and intercompany purchases and sales. The gross notional dollar amount of these foreign exchange contracts at December 31, 2025 was \$88,555. At December 31, 2025, a hypothetical 10% strengthening or weakening

in the U.S. dollar would have changed Accumulated other comprehensive income (loss) by \$77. The Company enters into forward foreign exchange contracts to hedge transaction exposures or significant cross-border intercompany loans by either purchasing or selling specified amounts of foreign currency at a specified date. The gross notional dollar amount of these foreign exchange contracts at December 31, 2025 was \$370,668. A hypothetical 10% change in the year-end exchange rates would have resulted in an increase or decrease to Income before income taxes of \$2,779 related to these positions. However, any loss (or gain) resulting from a hypothetical 10% change would be offset by the associated gain (or loss) on the underlying balance sheet exposure and would ultimately not materially affect the Company's financial statements. The Company also has a foreign currency forward contract hedge designated as a net investment hedge with a notional dollar amount of \$337,659 at December 31, 2025. At December 31, 2025, any loss (or gain) resulting from the hypothetical 10% strengthening or weakening in the U.S. dollar would have changed Accumulated other comprehensive income (loss) by \$27,652. The fair value of the Company's cash and cash equivalents at December 31, 2025 approximated cost due to the short-term duration. These financial instruments are subject to concentrations of credit risk. The Company has minimized this risk by entering into investments with a number of major banks and financial institutions and investing in high-quality instruments. The Company does not expect any counter-parties to fail to meet their obligations. ■ ITEM 8.
